

Bhavana Tallapaka

Hyderabad, India | +91-95536-63811 | bhavitallapaka2003@gmail.com | [linkedin.com/in/bhavana-tallapaka/](https://www.linkedin.com/in/bhavana-tallapaka/) | github.com/BhavanaTallapaka

Profile

Data Science enthusiast with hands-on experience in machine learning, data analysis, and full-stack development. Built projects including fraud detection (92% accuracy, 90% recall), deep learning models, and large-scale data analysis (271K+ records). Interested in applying data-driven solutions to real-world problems.

Education

B.Tech in Computer Science & Engineering | Guru Nanak Institute of Technology
2021 – 2025 | GPA: 7.83

MPC | Narayana Junior College
2019 – 2021 | Percentage: 89.8%

High School | Vivekananda High School
2019 | GPA: 9.2

IELTS | Band: 6.5

Technical Skills

Programming: Python, Java, C#, SQL
Data Science: Machine Learning, Data Analysis, Data Cleaning, Feature Engineering
Tools & Technologies: Tableau, Power BI, Jupyter Notebook, GitHub, VS Code
Frameworks: .NET, Blazor
Core Concepts: Statistics, Probability, Linear Algebra (basics)
Other: Web Scraping, Data Visualization

Experience

Tech Learner - Threat Intelligence Bureau Ltd (Nov 2025 – Present)

- Developed a Sales and Task Management System using .NET, Blazor, and C#
- Designed and implemented backend logic and UI components
- Gained hands-on experience in full-stack application development

Account Associate - VXI Global Solutions (Jan 2025 – Mar 2025)

- Managed customer accounts and handled data operations with accuracy
- Collaborated with teams to resolve issues and maintain service quality
- Strengthened communication and workflow management skills

Projects

Fraud Detection in Internet Banking using Machine Learning - [GitHub](#)

- Developed fraud detection models using Logistic Regression and Random Forest on **1500+ transactions**
- Performed data preprocessing, feature engineering, and handled class imbalance using SMOTE
- Achieved **92% accuracy** with **90% recall**, effectively reducing false negatives in fraud detection
- Evaluated model performance using precision, recall, F1-score, and ROC-AUC

Autoencoders using Handwritten Digit Dataset - [GitHub](#)

- Built deep learning autoencoder models on MNIST dataset for feature extraction
- Learned compressed representations of input data from **784 dimensions to lower latent space (~32–64 features)**
- Improved noise reduction and data representation using neural networks

Data Analysis on Olympics Dataset - [GitHub](#)

- Conducted exploratory data analysis on **271,000+ records** using Python (Pandas, Matplotlib, Seaborn)
- Identified trends in medal distribution, country performance, and athlete participation over time
- Created visualizations to highlight historical insights and patterns

FIFA Dataset Analysis using Web Scraping - [GitHub](#)

- Collected and processed **1000+ player records** using web scraping (BeautifulSoup)
- Cleaned and structured raw data for analysis
- Analyzed player performance metrics to identify top-performing players and trends

Blockchain-Powered Smart City Framework with Enhanced Privacy and Security - [GitHub](#)

- Designed a blockchain-based IoT architecture for secure data sharing in smart city environments
- Proposed privacy-preserving mechanisms to prevent unauthorized access
- Integrated decentralized storage concepts to enhance system security

Quantum Data Analytics Job Simulation - [GitHub](#)

- Analyzed retail transaction data across **multiple stores and 70+ time periods**
- Identified high-performing stores with sales exceeding **6000+ units**
- Discovered strong correlations between store performances (**up to 0.90**)
- Generated insights for customer segmentation and business decision-making

Sales and Task Management System (.NET, Blazor, C#)

- Developed a full-stack web application to manage sales pipelines and task workflows
- Implemented CRUD operations, real-time updates, and dashboard features
- Streamlined task tracking and improved workflow management

AI Chatbot Development Projects

- Built conversational AI chatbots for automated user interaction
- Designed intent-based response systems and conversational flows
- Improved response accuracy through iterative testing

Certificates

- Data Analytics Job Simulation – Quantum
 - Data Scientist – Devtown
- Salesforce Developer – Smart Internz
 - Java Certification – Intrainz

Achievements

- Winner of multiple school competitions, including recycling and poster-making.
- Served as **Class Representative for 3 years** and led major student activities.
- Active NCC participant in rallies, plantation drives, and eco-friendly initiatives.
- Completed a certified UNICEF program on **Emergency Nutrition Coordination**.

Extracurriculars

- Class Representative (3 years)
- Active NCC participant
- Participated in social and environmental initiatives

Activities and Interests

Exploring AI Tools, Open-Source Learning, Data Science Projects, Drawing, Painting, Gardening, Cooking.
